Certified by various Bootcamp organizers and SRM university

CAREER OBJECTIVE

Enthusiastic and proactive entry-level developer with practical project experience in Python, Java, and MERN stack technologies. Eager to contribute effectively to innovative projects and continue learning and growing in web development. Strong technical skills combined with a collaborative mindset and a passion for excellence drive my ambition to succeed in the industry.

Project-based Experience:

- Developed a WhatsApp chat analyzer using Python, implementing data analysis techniques to extract insights from chat histories.
- Designed and developed an e-commerce application using Java, integrating backend functionalities with frontend components for user-friendly navigation and functionality.

Technical Skills:

- Proficient in HTML, CSS, JavaScript, React, Next.js, Node.js, Java, Python, Git.
- Completed coursework in web development and software engineering.

Soft Skills:

- Strong communication skills demonstrated through team projects and presentations.
- Effective problem-solving abilities showcased in resolving coding challenges during project development.

Education:

Bachelor of Science in Computer Science (DS/AT), [SRM University], [2022-2026].
